## 'CRIME OF 1873"

Col. Gorham Thinks He Has Exposed Leading Criminals.

HIS LETTER OF DISCOVERY

It Made Somewhat of a Stir at St. Louis Saturday Last, Where It Was Read at a Political Meeting-Sherman and Hooper Are the Ones Named by Him.

Col. George C. Gorham, of this city, who was secretary of the Senate in the now famous year of the demonstration of silver, thinks he has exposed the leading criminal in the "Crime of 1873."

Cot. Gornam has been a Republican all his life, but this does not prevent him from exposing what he believes to have been the greatest crime of modern linancial legisla tion. A few days ago he wrote a letter to ex-Gov. Charles P. Johnson, who read it in a political speech at St. Louis last Sat-urday night. The letter is said to have created a great sensation. The letter openly charges Senator Sherman with having deliberately deceived his fellow-Sena-tors, morder to have the bill passed. The letter reads as follows:

From the record, which I have faith-Lord Chief Justice Russell, of England. Lady Russell, and their daughter, Hon. Miss Lillian Russell, left the Artington at an early four shis morning on their state. fully reproduced, it is impossible to reach any other conclusion than that the confidence of the House was abused by Mr. Hooper, that the confidence of the Senate was abused by Mr. Sherman, and that by their joint efforts the most important piece of legislation of the century was carried through Congress by steatth, and the double standard, which had existed by the people for more than eighty years, was taken away from them without their consent or knowledge in the interest of aliens, by the manipniations described. The men who did this work did it furtively and fraudulently, because they knew that if submitted either to the people or to Congress, its overwhelming defeat would have been insured."

THREE BLOWS DELIVERED.

Col. Gorham's letter is an exhaustive one but it is filled with some startling facts taken from the records of the Senate and House. He points out that Senator Sherman made three attacks upon the double standard before he accomplished his foul purpose by stealth. Of this Col. Gorham has this to say:

The national debt, at the close of the Civil War, was about twenty-five hundred millions, the principal teing payable in any legal tender money and the interest in coin. Cermin great banking houses of Europe, following the example set by their predecessors In England, and setting an example which was followed by their class in Germany after the France-Prussian war, inaugurated a scheme to greatly enhance the value of this vast obligation by making it payable in gold and thus increasing the value of gold.
"This involved two legislative measures:

Such changes in the laws of the United States as would provide for the payment of any portion of it, prior to the resamption of specie payment, in legal tender. Treasury notes in which it was expressly made payable by the law authorlying the twoie of the bonds, and hexchange which, when greatly depreciated, they had all been issued.

THE SECOND ATTEMPT.

After describing the first attempt to acaccomplish the demonetization of the white unsuccessful attempt at the demonetization of silver was inaugurated on the 25th of April, 1879, by the introduction in the Senator Sherman of "A bill No. 859) revising the laws relating to the mint, assay offices and coinage of the United States.' According to this statement the bill was

framed in the Treasury Department by a distinguished body of experts." It contained 71 sections, the fifteenth of which gave a list of all silver coins to be thereafter issued, and the eighteenth of which prohibited the issuance of any not named therein. The silver dollar was omitted from the list, and the mints were thereby to be closed against deposits of silver bullion for coinage. But the bill centained no reference to this fact, which might be said to appear only by not appearing, Nor did Mr. Sherman call the attention of the Senate to this proposed momentous revolution in our monetary system,

On the contrary, he reported a deceptive amendment to the bill, Imposing a charge wifether the gold and silver to be deposited be coined or east into bars or ingots." He vigoro susty supported this amendment, the assertion that under the bill silver bullion could still be deposited for coinage, when he knew that section 18 expressly provided that it could not. No better proof could be needed that the Senators h dressed were unaware of the omission by him of the silver dollar than the fact that no one appeared to observe this gross in The bill passed the Senate January 10.

CRIME AT LAST TRIUMPHS. The third and finally successful movement introduction in the House of Representatives on the 9th of March, 1871, of "A bill (No 1427) revising and amending the laws relative to mints, assay offices and coinage of the United States." It was introduced by Mr. Kelley of Pennsylvanta, chairman of the Committee on Coinage, and reported by him favorably from that committee on the 9th of January, 1872. He informed the House that it had been prepared in the Treasury Department for the purpose of codifying and simplifying the mint laws, mittee-Mr. Maynard of Tennessee-both stated that it was a mere revision of the mint laws, the only important change being the creation of a Mint Bureau in the Treasury

Department. It was recommitted January 10, and again reported with amendments February 0, 1872—this time by Hon. Samuel hooper of Massachusetts. He stated that the bill reduced the weight of the silver dollar from 412 1-2 grains to 384, but he did not state that it proposed, as it did, to demonetize silver by making the silver dollar a legal tender only in sums not to exceed \$5. Mr. Clarkson Potter of New York, however, debated that provision, which he objected to as being ill-timed, and he also strongly objected to the other
